LETTERING STAMPS – TYPE SETS

Type Sets can be supplied for all the font designs shown in the samples, either in brass or hardened steel.

The types are machine made and hand finished. They ensure a neat and deep print.

For the decision to use types made in brass or in steel, the following points should be borne in mind:

Brass is cheaper, but it is worn out after about 20000 stampings.

Steel has an almost unlimited life after it has been hardened. Therefore, for continuous operations steel is advisable.

Type height :	standard : 23,56 mm for clamping in type boxes. - other sizes on request -
Lettering height :	The standard program covers lettering height up to 10 mm. - other heights on request -
Set (No. and quantity) :	Our sets of type are proposals based on experience. - alternations to the compositions are certainly possible -
Prices :	Prices are for complete sets of at least 100 pieces. Individual supplies under 100 pieces need surcharge depending of quantity. Concave sets (for stamping round items) are to request. The spacers required for the type set and a wooden box are calculated upon the size.

By ordering please specify as following:

1. Lettering design / lettering font
2. Lettering height
3. Type height
4. Set (No. and quantity)
5. Special requirements, such as accent symbols, concave finish, etc.

When reordering or supplementing sets previously purchased, please provide a sample type under all circumstances (if possible E or Z).
